

CET33 Professional Grade Vinyl Electrical Tape

All weather, professional grade, pressure sensitive vinyl tape which applies easily and gives excellent performance over a wide range of temperatures. Cold and weather resistant. Flame retardant. CET33 can be used as primary insulation for splices up to 600 volts. Use as protective outer jacket over splices and for all low temperature applications.

CET77 Arc & Fire Proofing Tape

An unsupported, linerless elastomeric tape for arc and fire proofing high voltage & communication cables and splices. The unsupported construction offers excellent flexibility and conformability for easy application. When subjected to severe flame conditions, CET77 will generate a thermally insulating residue for cable protection.

CET88 Heavy Duty Vinyl Electrical Tape

All weather, heavy duty grade, pressure sensitive vinyl tape that provides heavier thickness for added mechanical and electrical protection. Cold and weather resistant. Flame retardant. CET88 can be used as primary insulation for splices up to 600 volts. Excellent protective jacket over all types of splices. Excellent cold weather performance.

CET130C Linerless EPR High Voltage Insulating and Jacketing Tape

EPR, self bonding, high voltage tape for insulating and jacketing splices through 69kV. The linerless feature permits much quicker taping speeds than tape with a liner and yield a uniform, void-free build-up. CET130C is compatible with all extruded cable insulations and the excellent stretch allows conformance to the most complex shapes and contours.

CET50 Pipe Wrap Tape

A corrosion protection, pressure sensitive vinyl tape giving complete environmental, mechanical and electrical protection for all types of pipewrapping applications. UV, bacteria and fungus resistant. CET50 tape can be used for both overhead and direct burial applications.

CET35 Professional Grade Color Coding Vinyl Electrical Tape

All weather, professional grade, pressure sensitive vinyl tape that is available in nine colors for color coding and insulating. Cold and weather resistant. Flame retardant. Use CET35 for quick identification of electrical circuits, containers, and conduit systems, as well as primary insulation for splices at not more than 600 volts.
